CAREER OBJECTIVE

I'm looking to start my career as a Developer where I can put my foundation in frontend technologies, API design, and database management into practice. I am driven to continuously master my current skills while exploring new frameworks, with the goal of expanding my experience to become a versatile Full Stack Developer.

EDUCATION

BS Information Technology (2022 - 2026)
San Sebastian College-Recoletos Canlubang
Calamba City, Laguna

CAPSTONE PROJECT (SOLO)

Desktop-Based Offline Application

- Java-based Library Management System using Java Swing
- Database powered by MySQL
- Fully functional working prototype
- Designed for offline use
- Awarded Best Prototype

TECHNICAL SKILLS

Development & Programming

- **Frontend:** HTML, CSS, JavaScript, Bootstrap.
- **Backend:** PHP, Python.
- **Database:** MySQL, MariaDB, Database Design & Integration, Database Optimization.
- **Frameworks & Architectures:** MVC Architecture, CRUD Operations, PHP Sessions.
- **Other:** Java (Desktop development using Swing).

Software & Tools

- **Version Control:** Git, GitHub.
- **Testing & Environment:** Postman (API Testing), XAMPP, VS Code.
- **Project Management:** JIRA, Documentation (Notion, OneNote).

Security & Best Practices

- **Web Security:** SQL Injection Prevention, Prepared Statements, Access Control, Basic Web Application Security Fundamentals.
- **API:** REST API Development and Integration.

IT Infrastructure & Networking

- **Networking:** IP Addressing, DNS, DHCP, Basic Network Troubleshooting.
- **Systems:** Active Directory, Windows OS Troubleshooting, Microsoft 365 (Outlook, OneDrive, Excel).
- **Support:** Help Desk Ticketing (Spiceworks), Remote Support (AnyDesk), Video Conferencing Tools (Zoom).

Soft Skills

- Customer Service
- Problem-Solving
- Willingness to Learn
- Documentation & Reporting
